THE RELATION OF AGRICULTURAL EXPORTS TO GROSS INCOME
FROM AGRICULTURAL PRODUCTION AND TO TOTAL EXPORTS

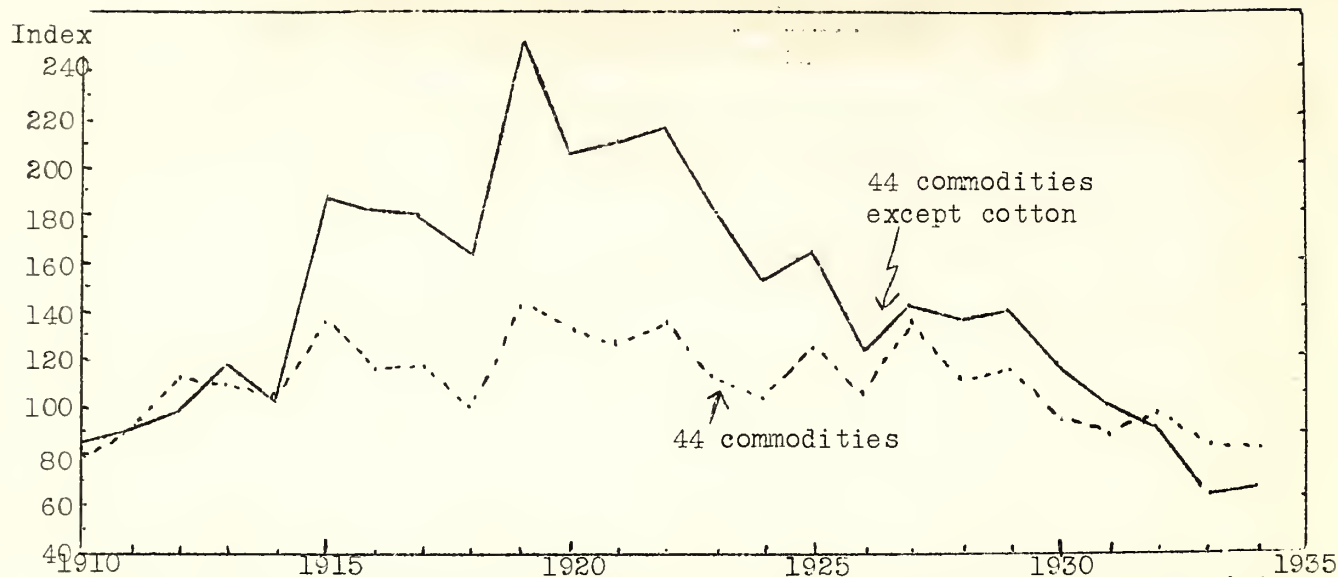

During the pre-war period agricultural exports (based on export point values) averaged 16 percent of the gross farm income. This percentage increased to 21 percent in the 4-year period 1917-20 and has since declined to 11 percent for the 4 years 1930 through 1933.

INDEXES OF QUANTITIES OF AGRICULTURAL EXPORTS

The volume of exports of the 44 principal agricultural export commodities reached a peak shortly after the close of the war and for the 4-year period 1919-22 averaged one-third greater than for the pre-war period. The volume of agricultural exports has been lower than the pre-war average since 1929.
